حكمة اليوم

لا تتقدم على وقت ضاع من عمرك
في تجربة تعلمت منها درساً مفيداً
فهذا أفضل من أن تتقدم على
ضياع عمرك كله دون أن تتعلم شيئاً

Number topic

respiratory syncytial virus (RSV)

Overview

Respiratory syncytial virus causes infections in the lungs and airways. It is so common that most children have it before they are two years old. RSV can also infect adults.

In otherwise healthy adults and older children, symptoms of RSV are mild, usually similar to those of a common cold. Self-care measures are usually all that is needed to relieve the feeling of illness.

Do you know??

- Did you know that kangaroos will not be able to jump if their tail is raised, because they mainly use it to achieve balance?
- Did you know that mice reproduce very quickly, as it is possible to produce a family of more than a million mice within a year and a half?
- Did you know that giant jellyfish located in the Arctic have nails that can reach a length of more than 36 meters.
